Web Page Shares Personally Identifiable Information of CEOs

F-2025-05-30b

Classification: TLP:CLEAR

Criticality: HIGH

Intelligence Requirements:

May 30, 2025

Scope Note

ZeroFox Intelligence is derived from a variety of sources, including—but not limited to—curated open-source accesses, vetted social media, proprietary data sources, and direct access to threat actors and groups through covert communication channels. Information relied upon to complete any report cannot always be independently verified. As such, ZeroFox applies rigorous analytic standards and tradecraft in accordance with best practices and includes caveat language and source citations to clearly identify the veracity of our Intelligence reporting and substantiate our assessments and recommendations. All sources used in this particular Intelligence product were **identified prior to 15:00 PM (EDT) on May 30, 2025**; per cyber hygiene best practices, caution is advised when clicking on any third-party links.

| Flash | Web Page Shares Personally Identifiable Information of CEOs

| Key Findings

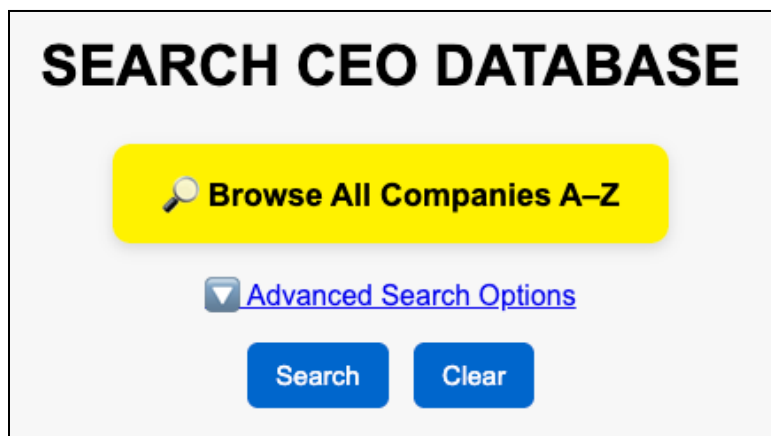

- A person or group with an affinity for the suspect alleged to have murdered a United Health Care CEO promoted an online database containing personally identifiable information (PII) on at least 1,061 corporate executives.
- Although the site has been taken offline as of this writing, an archived version remains, which could still enable a motivated, internet-literate person or group to gain access to an executive's PII.
- The database consolidates already publicly available contact information in one place—including executive names, job titles, company affiliations, LinkedIn profiles, and in many cases, mobile phone numbers—raising concerns about its potential misuse for harassment or targeted intimidation.

| Details

On May 29, 2025, ZeroFox observed the web page theceodatabase[.]com, which hosts a publicly accessible database of PII associated with over 1,000 corporate executives. The domain appears to be a copy of another web page, luigiwasright[.]com, which was registered in April 2025. Both domains return a 502 error at the time of writing, but much of the information can be observed via a web archive capture.

The PII database features the following fields:

- Company Name
- Job Title
- First Name
- Last Name
- Email (address)
- Mobile (number)
- Office (number)
- Personal LinkedIn URL
- Website
- Department
- Company Valuation
- Seniority

Source: ZeroFox Intelligence

While all fields within the database are populated, ZeroFox has not verified the authenticity and accuracy of the information as of this writing. The origin of the information is unclear, though the majority of fields are almost certainly drawn from publicly available sources, such as social media platforms, business directories, news outlets, or stock market indexes—much of which could be compiled using easily-accessible scraping tools. However, the origin of the phone numbers is unclear, with a roughly even chance that the data was compiled from one or more data breaches.

- The vast majority of listed organizations and executives are located within the United States, though entities registered within Europe and Asia were also present.
- ZeroFox observed no correlation between organization size, annual revenue, or industry.

The domain `luigiwasright[.]com` is almost certainly a reference to Luigi Mangione, the individual arrested for the murder of a UnitedHealthcare CEO on December 4, 2024. This choice of domain name alludes to the likely antagonistic nature of the database, suggesting its intent is to encourage or facilitate hostile action against CEOs. This is compounded by a statement noted within the web page about the site being intended to “empower ordinary citizens” to directly contact “decision makers.”

About This Project

This website is designed to empower ordinary citizens to reach decision makers directly.

THIS WEBSITE IS FREE TO USE — BUT NOT FREE TO SET UP

We are being forced to:

- **Forced to train Artificial Intelligence and THEFT of your intellectual property and PRIVACY**
- **Undergo facial recognition without consent**
- **Have our personal information, including medical information, BOUGHT, SOLD and STOLEN**
- **Be sent to USELESS CUSTOMER SERVICE numbers while the executives in charge PROFIT and HIDE**

These well-paid executives make decisions that affect every aspect of our lives, yet remain completely unaccountable.

Statement posted within `theceodatabase[.]com`

Source: ZeroFox Intelligence

ZeroFox has not observed any significant promotion or deep and dark (DDW) chatter surrounding the database as of this writing, though a PayPal “donate” section within the web page links to an entity named “No App Bans LLC”. This PayPal page is not currently accessible, though ZeroFox notes it is associated with an individual located in the United States that has previously promoted luigiwasright[.]com on the Facebook platform.

Appendix A: Traffic Light Protocol for Information Dissemination

	Red	Amber
WHEN SHOULD IT BE USED?	Sources may use TLP:RED when information cannot be effectively acted upon by additional parties and could lead to impacts on a party's privacy, reputation, or operations if misused.	Sources may use TLP:AMBER when information requires support to be effectively acted upon but carries risks to privacy, reputation, or operations if shared outside of the organizations involved.
HOW MAY IT BE SHARED?	Recipients may NOT share TLP:RED with any parties outside of the specific exchange, meeting, or conversation in which it is originally disclosed.	Recipients may ONLY share TLP:AMBER information with members of their own organization and its clients, but only on a need-to-know basis to protect their organization and its clients and prevent further harm. Note that TLP:AMBER+STRICT restricts sharing to the organization only.
	Green	Clear
WHEN SHOULD IT BE USED?	Sources may use TLP:GREEN when information is useful for the awareness of all participating organizations, as well as with peers within the broader community or sector.	Sources may use TLP:CLEAR when information carries minimal or no risk of misuse in accordance with applicable rules and procedures for public release.
HOW MAY IT BE SHARED?	Recipients may share TLP:GREEN information with peers and partner organizations within their sector or community but not via publicly accessible channels.	Recipients may share TLP:CLEAR information without restriction, subject to copyright controls.

| Appendix B: ZeroFox Intelligence Probability Scale

All ZeroFox intelligence products leverage probabilistic assessment language in analytic judgments. Qualitative statements used in these judgments refer to associated probability ranges, which state the likelihood of occurrence of an event or development. Ranges are used to avoid a false impression of accuracy. This scale is a standard that aligns with how readers should interpret such terms.

Almost No Chance	Very Unlikely	Unlikely	Roughly Even Chance	Likely	Very Likely	Almost Certain
1-5%	5-20%	20-45%	45-55%	55-80%	80-95%	95-99%
